DETAILED ACTION

Allowable Subject Matter

Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art of record fails to teach or suggest a stereoscopic apparatus for producing a left and right image using a linear image modulator, a scanning ball lens assembly, a curved mirror positioned between the left and right scanning ball lens assembly, and two beamsplitters.

The remaining claims depend from claim 1 and are therefore allowable for the same reasons stated above.

Agostinelli (US 6,511,182) teaches a stereoscopic apparatus for producing a left and right image using a scanning ball lens assembly, a curved mirror positioned between the left and right optical assemblies and a beamsplitter. Agostinelli ('182) lacks reference to the use of a linear image modulator to modulate the incident light. It would not be obvious to one of ordinary skill in the art to add this feature to the current invention based on the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
